EasyPortal

Purpose

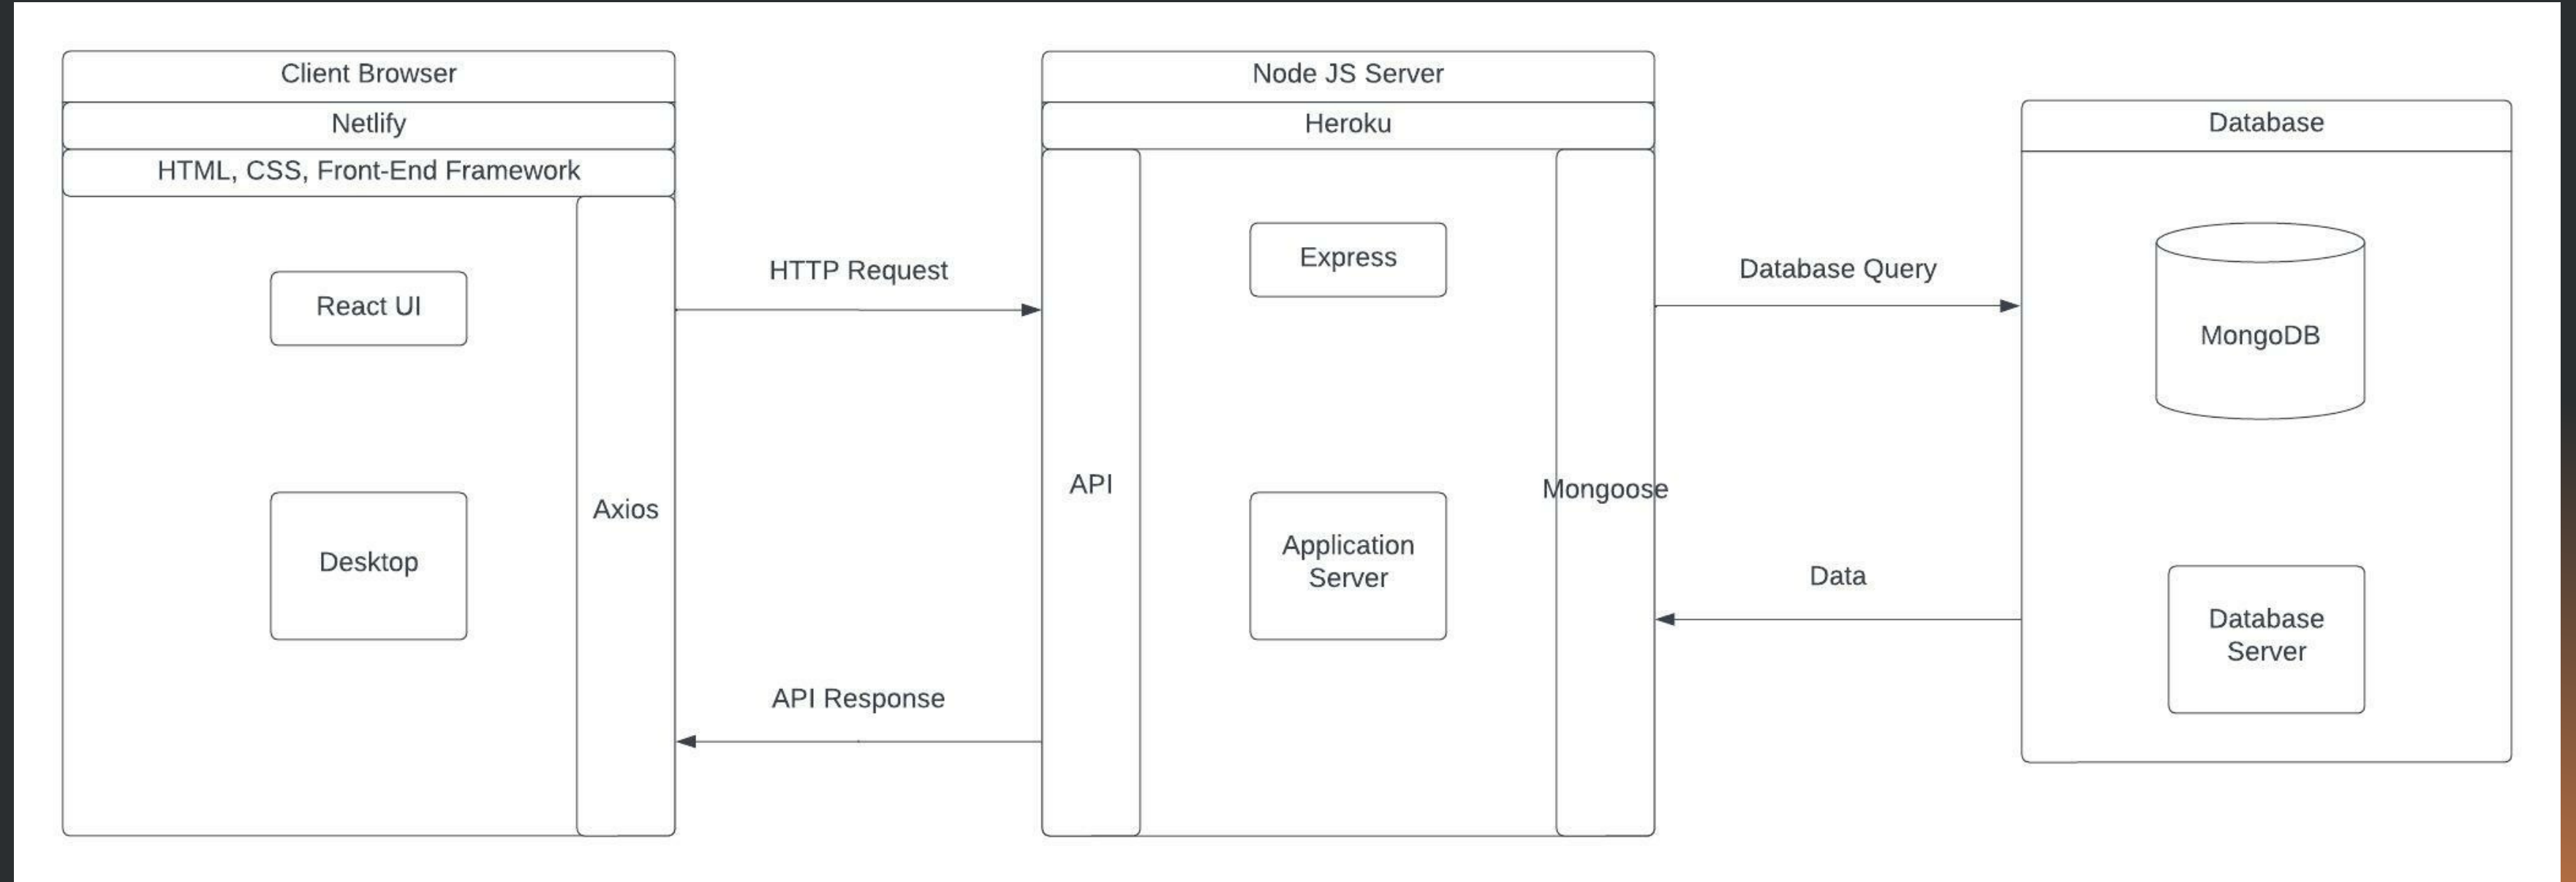

The purpose of this web app is to manage, calculate and display employees' payroll and scheduling activities.

EasyPortal seeks to solve how these issues can impact smaller businesses, where these responsibilities often fall to only one or two people and can be very time consuming.

Target Audience

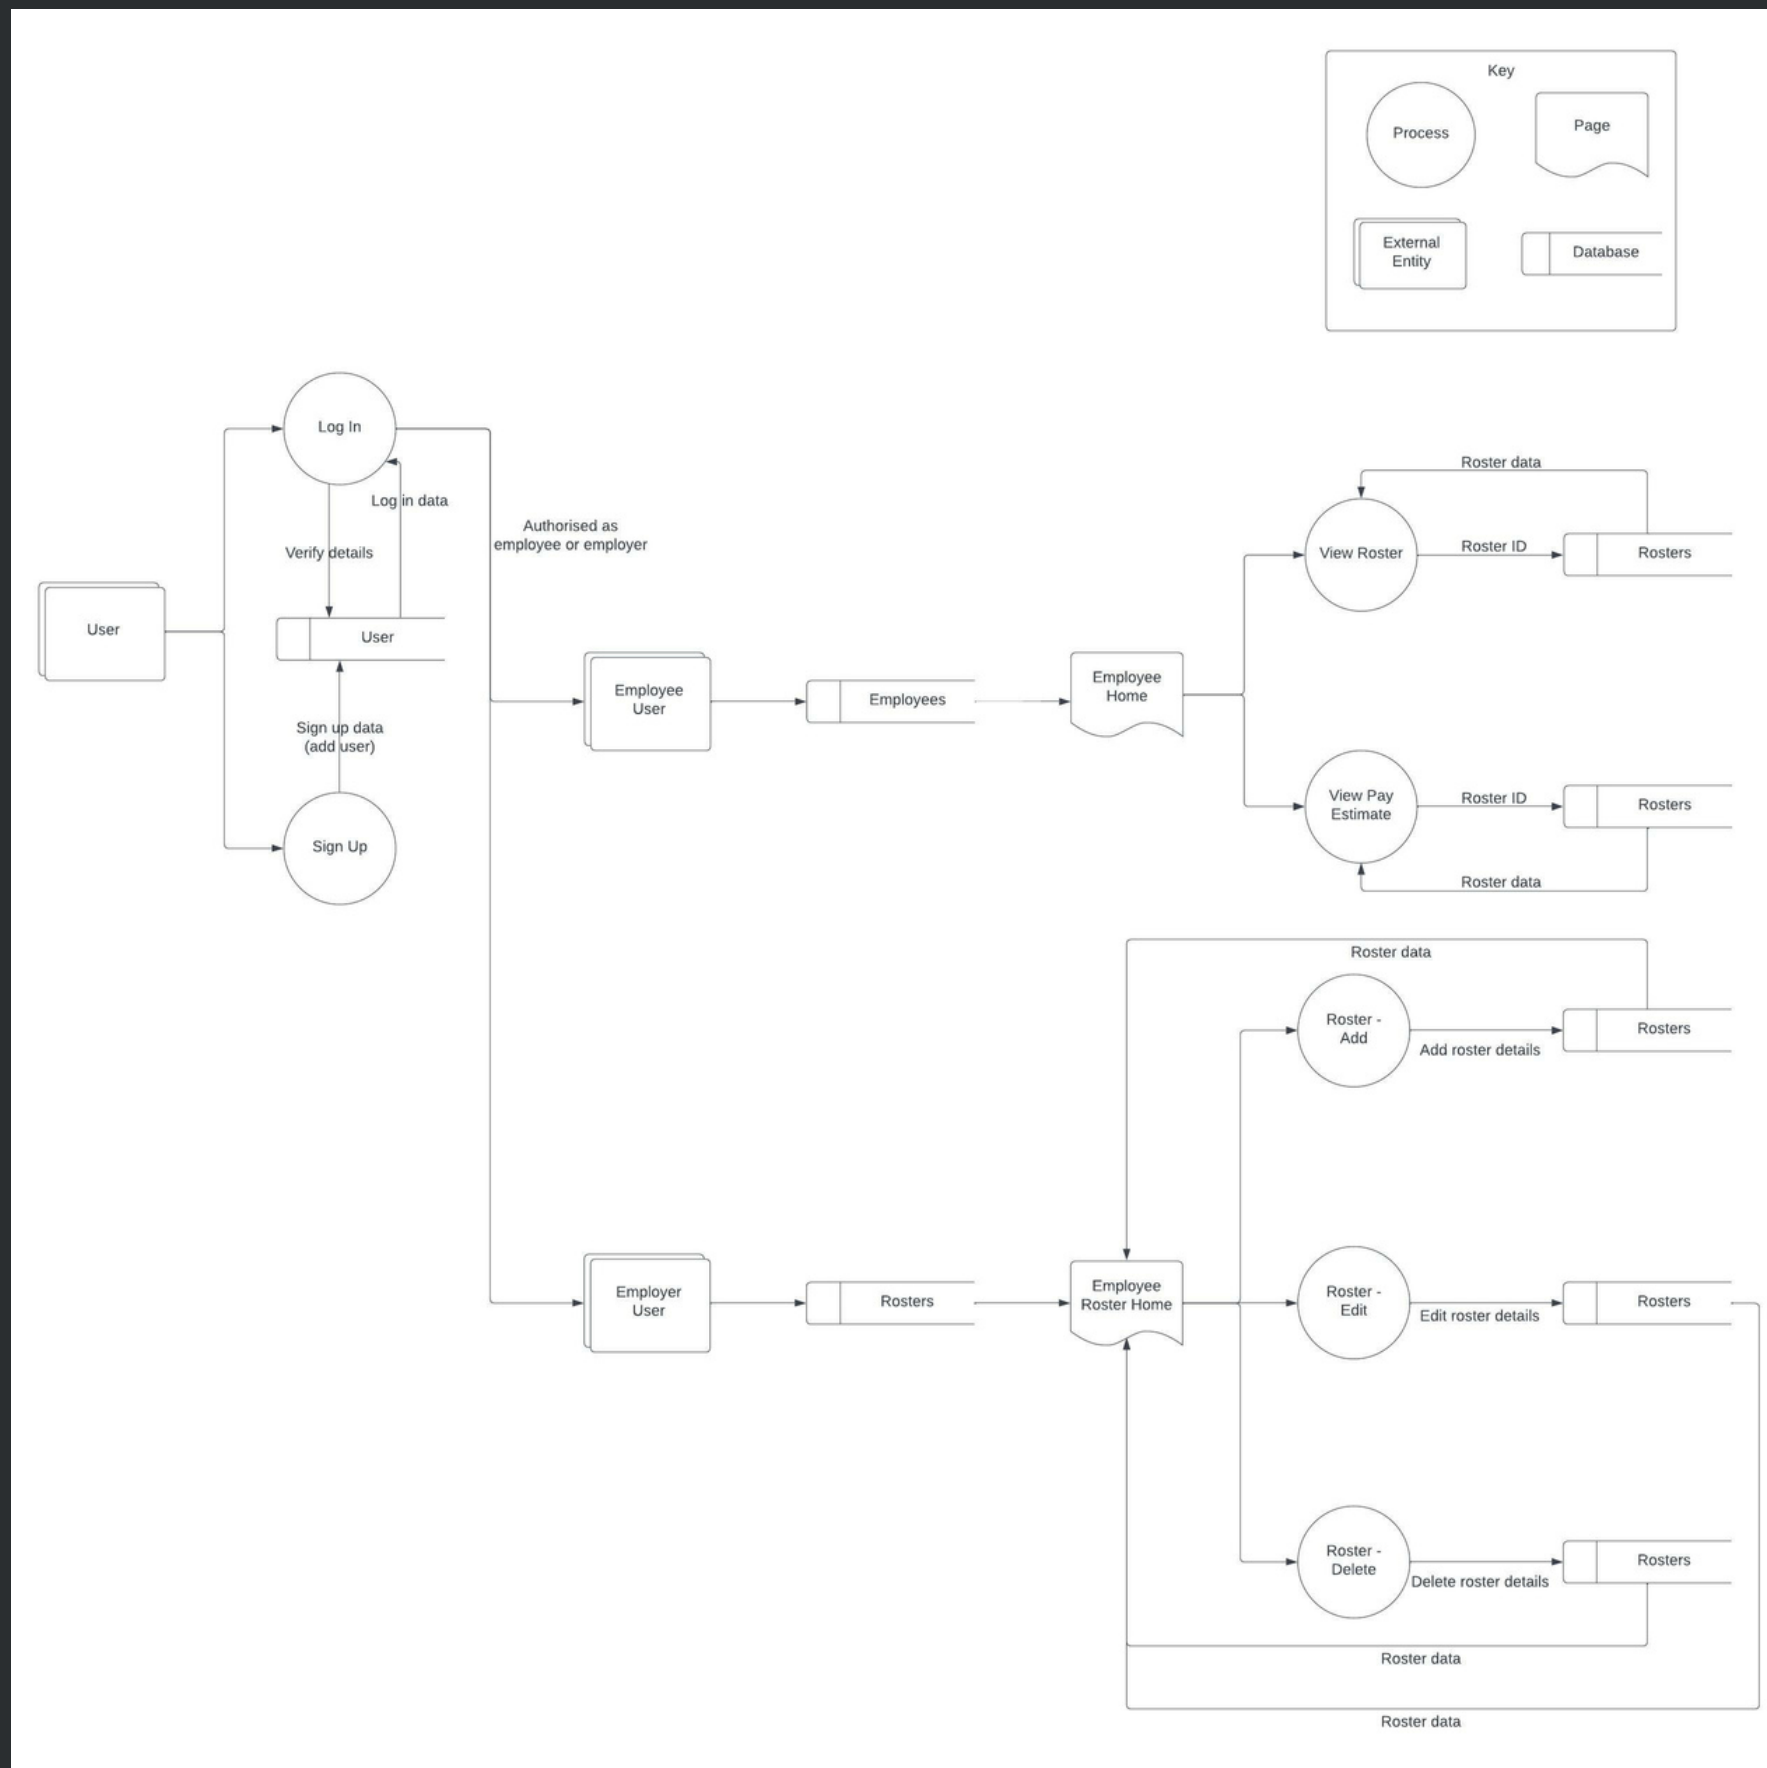

Three main targets:

- Businesses that have casual, part time and full time employees that have irregular working hours.
- Employer will be able to roster their employees easily
- Employees will be able to use this portal that has an interactive and fun design, so that employee will easily be able to understand their rosters and payroll summary for better clarity and avoid confusion.
